Scientists Claim Hay Should Not Be Cut Until Afternoon

In my boyhood days on a Minnesota farm, says Hilton Irja Jones, in the Rotarian, a neighbor used to claim that his hay was better because he never cut it in the forenoon. We called him crazy. Now come Cornell University scientists with a declaration which indicates that he was right. Flowers, too, they say, will last some ten hours longer if cut about 4 p.m. than if cut in the morning. The reason appears that plants leave make sugar only when the sun is shining.

content, the better they keep. This fact likely explains why putting stems in a diluted sugar solution tends to keep flowers from wilting.

Advice To Mr. Harry

Recommendations That He Marry For Love, But Girl Should Have Some Money

George Wood of Broadstairs, Kent, who died last November, left with his note a recommendation to E. Wood, recommending that he marry for love but that he "should not marry a girl who has no money."

"I'm very hard for a girl to have to ask her husband, especially if he is a poor man, for every penny she needs and for every thing she does not tend to make for happiness," the

father cautioned.

"A girl on marriage should have a sufficient income to dress herself without stint and a little pin money in addition. If she has more, she can make the better for herself."

Mr. Wood, Sir, let \$1.100 (\$4.86).

GEMS OF THOUGHT

TODAY

Out of Eternity the new Day is born;
Into Eternity at night will return.

— Thomas Carlyle.

Look upon every day as the whole of life, not merely as a section; and enjoy and improve the present without wasting, through haste, to rush into another. Richter.

To those heaving on the sustaining
infinite, today is big with blessings—
Mary Baker Eddy.

One of the illusions is that the
present hour is not the critical de-
cisive hour—Emerson.

The present moment is all we can
call our own for works of mercy,
of righteous dealing, and of family
affection—Emerson.

Build today, then, strong and sure,
With a firm and ample base;
And ascending and secure
Shall tomorrow find its place
—Longfellow.

Armenia became the first nation
in history to adopt Christianity as a
state religion in 303 A.D.

TO THOSE WHO SUFFER WITH the misery of FIBROSIS

NOTE—The sponsor of this notice is an old, reliable firm doing business in Canada for over 20 years. Hem-Roid must help your smothering and painful pile condition—must do it quickly, easily and pleasantly or your own test of this remarkably successful formula costs you nothing. Try it today.

WORLD FOOD EMERGENCY

A serious shortage of food in certain areas of the world was expected, but crop failures in many areas, and lack of distribution facilities, send, and leads in others created a food shortage of alarming proportions. Only immediate deliveries of staple foods can sustain the hungry millions.

PRODUCE AND SAVE - MORE

Since 1939, our per capita record of food exports has exceeded that of any other country. Food production has soared. Canadian have eaten well in spite of war. Today, the seriousness of the world's food situation calls for even greater efforts. We can increase our food shipments and still have enough for our needs.

THIS IS WHAT WE CAN DO

We can ship more wheat, FLOUR, MEATS, CHEESE and EGGS if as great quantities as possible are made available for shipment during the next four months.

PRODUCERS - DELIVER TO MARKET

CONSUMERS - BUT LESS OF THESE FOODS - BUY ORGANS IMMEDIATE NEEDS - WASTE NOTHING - PLANT A GARDEN - SUBSTITUTE VEGETABLES FOR AS MANY OF THESE VITAL FOODS AS YOU CAN.

This will increase supplies at storage depots, thus freeing additional needed foods for the world's hungry. There can be no permanent prosperity for us... or anyone... while hunger and despair afflict large areas of the world.

Share with the hungry!

ARMING TO KEEP PEACE?

To an outside observer, the recent announcement from Ottawa regarding Canada's armed forces suggests an ironical commentary on world progress toward the goal of universal peace. Certainly, the figure of around 100,000 men for the army alone (which includes 25,000 in the permanent force and the manning of six reserve divisions), is unlikely to be awe-inspiring in a world which is accustomed to the levying of armies by the million. Nevertheless, the proposal seems so definite a departure from normal Canadian peace time military conditions, that it is not inappropriate to speculate upon what grounds the decision has been taken to abandon the old happy-go-lucky methods of earlier days in our military affairs in favor of instituting a modern, scientific service, small in numbers, but which could be quickly and effectively expanded in case of need.

One contingency may be noted in advance: since Canada is a signatory to the United Nations Charter, she can expect to be called upon for a share in police work for that organization, if it becomes necessary.

Beyond this, however, are a few seemingly insignificant details which would appear to indicate a purpose far removed from mere routine work of that nature. There is, as instance, visits of United States army staff officers to the Ministry of the Interior, and the substitution of private first-class, a correlation in many terms with our United States neighbors, while the "Musk-Ox" expedition into the Arctic regions certainly has not been undertaken without good and sufficient reasons.

More than ever, today, on the shoulders of an elected government, there is a heavy responsibility. The shape of things to come, very often are projected by their shadows. It was so in 1939, and again in 1941. The probability is that the governments of our North American continent are the countries of providing essential insurance to cover eventualities.

Quite evidently, the day has yet to dawn when the lion shall lie down with the lamb.

TEAMWORK OR TYRANNY?

By Sigt. Duncan Cameron. I'm returned G.I. and there's one kind of talk that really burns me up. With the mottoes of the soldiers overseas all sort and industries tied up of home, I follow had this nerve to say to the other day: "Oh well, we had more stress and more unemployed after the war than we'll straighten things out." This attitude is so typical of many people today who look at things through steeply blue and rose-colored glasses and expect things to blow over sooner or later.

Did my buddies get blown to bits on the beaches of Normandy and Anzio just so that we can have a few less unemployed or fewer stragglers than after the last war? Did we force the Nazis and Japs to hold peace so that we could return to our private lives at home? The extreme right tell us that Labor is to blame for everything. The Leftist groups tell us that it is all the fault of the employers and the big bosses.

The old game of blaming the other fellow is about as old as mankind. Something new has got to come into the situation. It's wake up or break up for America, and I'm not kidding!

I have talked with hundreds of A.P.I., C.I.O. and railroad leaders as well as leaders of management, in all the major industries across the country. Many of them have found that Frank Buchanan's idea of revolutionary teamwork is more effective than any idea of Marx or revolutionary management.

I saw revolutionary teamwork in action a few days ago in one of our great industrial cities. The superintendent of a plant and many of the union men came to see the industrial drama, "The Forgotten Factor," and caught the idea. He was amazed at the change in one of these union men.

The superintendent decided he needed to change too. He apologized to the union man and said, "I have blocked you every way I could because I did not trust you. That is past now. I am sorry. Let's work together." Difficult negotiations took an entirely different turn. That plant has found what I mean by "Revolutionary Teamwork." It has applied the ideology of Moral Re-Armament.

Get a few frogs in labor or management to live out this quality of teamwork and the other side will change too. We must put the country before cash. Labor and management, both have mind, but very many will only give the head that America needs? Revolutionary teamwork or tyranny by revolution—that is the choice confronting us today.

—Paul Theodore Canada Press Service.

VICTOR HAPPENINGS

Parading operations are in full swing now. Many tractors are going from early morning until late at night, and an occasional one goes all night.

Mr. Franklin Pridmore, with his car, has been making several stops at a few hours each, at various farms during the week, praising the tractor. He was at Mr. Ernie Hall's, J. L. Dechman's, Glen Thompson's, Jim Wilson's and Ross McLeod's before going to Harry Nelson's and points west.

Many young people have been spending their holiday at their homes, in this and adjoining districts. Among them, were Miss Doris Dechman, Miss Helen Miss Blanche Stoddard, Billie Stoddard, and Cecil Thompson.

Mr. S. Thompson, Jr., and his mother Mrs. Helen, spent a few days last week visiting in Calgary, returning home by train on Saturday night.

Several severe wind storms during the last couple of weeks have swept the district, bringing down the trees, and blowing down the roofs of many houses. The order of the day, in many homes here.

George Groves has a gotten away to study during the spring term, and finished leaving three hundred acres of spring rice on April 20.

Alberta University Farm Young People's Week

The university week for farm young people will be held at the University of Alberta, June 25 to July 1st. Any farm young people of Alberta, who are boys or girls, between the ages of 16 and 27 inclusive, may attend. Rooms and meals will be provided in the university residences at the rate of \$14 for the entire week. A fee of \$1 should accompany the registration form.

This event is proving more popular with farm young people each year. Any person who is interested should write to the Department of Extension, University of Alberta, Edmonton.

Cleaning Dairy Utensils

From the Dairy Commissioner, D. H. McCallum, comes word that cleaning of dairy utensils is usually the greatest single factor affecting the keeping quality of milk and cream. It may even be regarded as the most important factor in the entire dairy industry. To keep farm dairy utensils in good condition, satisfactory condition they must be free from rust, food, dirt and open means the presence of water, milk, cleaning and sterilizing impossible.

To clean and sterilize utensils the milk should be thoroughly rinsed out of the utensil with lukewarm (not hot) water immediately after use. The utensil should be scrubbed with a clean brush (not a cloth) in a wash tank of hot water containing a dairy washing powder. Any common brand of washing powder containing "bleaching agent" may be used by following the directions on the package. Most dairy plants as well as dairy supply houses, can supply such washing powders in convenient packages. The utensil should then be rinsed thoroughly in clean hot water.

Sterilization completes the process and is absolutely necessary to destroy harmful bacteria. You may not feel up to something but, that does not mean you have to be down on it.

WHO HAS ALL THE MONEY HE WANTS?

Joe Green is a steady worker with a steady job, his hours are steady but his bills, too, because of illness, he suddenly finds he is short of ready cash... tomorrow he will go to his bank and arrange for Personal Loan.

You may find yourself in the same position as Joe Green. Anybody may! Personal Loans through your bank make it possible for you to anticipate future earnings. This is an essential part of its services.

Such loans may be obtained to meet financial needs of many kinds; to lay in ahead a winter's supply of coal, to pay municipal or other taxes in time to earn the discount, to provide for home repairs, to send a boy or girl to college, to consolidate debts—indeed for any sound reason.

Bank credit runs through all personal life and commercial life. It operates silently and unobtrusively. You take it for granted. That is the way Canadian banking works.

THE WORLD OF WHEAT

By H. G. S. STEWART, Editor, "The Crop Testing Farm"

The Need For More Wheat

Europe continues to pour in from people on the spot in Europe and Asia of the tragic situation that millions will find themselves in the lack of food in the next few months. Every farmer who feels, therefore, that he can reasonably well spare even a load of wheat from his bin, will certainly be performing a most humanitarian act by selling it to market, so that it may be shipped quickly abroad.

most humanitarian act by selling it to market, so that it may be shipped quickly abroad.

But the need will not end in August. Much wheat—man's finest food—will be required during the Winter of 1946 and the Spring and Summer of 1947. Farmers, therefore, whose fields now have good reserves of moisture, and who feel they could use additional land to increase this coming Spring, would certainly be helping to alleviate the situation by selling wheat from their bins, thereby relieving the situation.

Standing on your dignity won't increase your stature.

A Call to Action

addressed to All Members of the Church of England in Canada by THE MOST REVEREND DERWYN T. OWEN, D.D., D.C.L.

Prime of all Canada

NEVER has humanity been in greater need of the Christian Gospel, the inspiration and guidance of Christian teaching and the Christian spirit.

Today we give thanks for a physical victory over forces opposed to every Christian principle. But these forces must still be fought in human minds and hearts. The only new order of building is a Christian order. At home and abroad, the Christian Church has a renewed challenge.

This is why the Church of England in Canada is making an appeal to her people for rededication, self-sacrifice and constructive action. This movement aims to make Anglians more truly Christian; to make them conscious of the historic mission of their Church; to strengthen the spiritual and moral life of the individual in his home and abroad; and to provide funds for additional Church work in Canada and throughout the world. The Mother Church in England and the Churches in Europe in their work of rehabilitation, for providing youth training and leadership, and for meeting all financial needs.

The Appeal was launched in our Churches on the Feast of the Epiphany, Sunday, January 6th, and will continue till May 15th. In its spiritual aspect it has already reached the homes of our people and it progressively continues over years to come.

During the week of May 15th to 19th, every member of the Church of England in Canada, so far as possible, visited by a personal message, authorities to receive contributions to the \$4,300,000 fund needed to carry out the financial program.

Derived from every one of our members and friends the earnest, powerful conviction of the urgent need. I am confident that if every individual does his part, the combined objective of spiritual enrichment and financial support will be fully achieved.
